

Database Requirement Analysis - BBMS

Table No.	Table Name	Purpose
1.	Users	Stores login credentials and user roles
2.	Donors	Stores donor information
3.	Blood_Inventory	Stores available blood stock details
4.	Donations	Stores blood donation records
5.	Blood_Requests	Stores blood request details
6.	Reports (Optional)	Stores generated report details

Table 1: Users : Stores user authentication and authorization details.

Attributes

- User_ID (Primary Key)
- Username
- Password
- Role (Admin/Staff)
- Email

Table 2: Donors : Stores donor personal and blood-related information.

Attributes

- Donor_ID (Primary Key)
- Donor_Name
- Age
- Gender
- Blood_Group
- Phone_Number
- Address
- Last_Donation_Date

Table 3: Blood_Inventory : Stores available blood stock information.

Attributes

- Inventory_ID (Primary Key)
- Blood_Group
- Available_Units

- Collection_Date
- Expiry_Date

Table 4: Donations : Stores blood donation records.

Attributes

- Donation_ID (Primary Key)
- Donor_ID (Foreign Key)
- Blood_Group
- Units_Donated
- Donation_Date

Table 5: Blood_Requests : Stores blood requests from hospitals or patients.

Attributes

- Request_ID (Primary Key)
- Patient_Name
- Blood_Group_Required
- Units_Required
- Request_Date
- Status
- Hospital_ID (Foreign Key)

Table 7: Reports (Optional) : Stores generated report information.

Attributes

- Report_ID (Primary Key)
- Report_Type
- Generated_Date
- Generated_By
